MATERIAL

WE USE

Wood (Solid Wood & Engineered Wood)

Lifespan: 15-50 years (depending on type and maintenance)

Used in: Flooring, furniture, cabinetry, wall paneling.

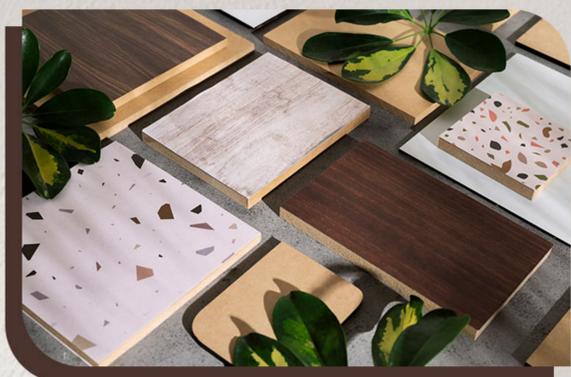

Notes: Solid wood lasts longer and can be refinished multiple times. Engineered wood is more stable in humid conditions.

Laminate

Lifespan: 10-15 years

Used in: Cabinetry, flooring, countertops.

Notes: Cost-effective and comes in various finishes, but may show wear and tear faster than wood.

Plywood

Lifespan: 20-30 years

Used in: Furniture, paneling, modular kitchens.

Notes: Versatile and strong, often used as a base material for other finishes like laminates or veneers.

MDF (Medium-Density Fiberboard)

Lifespan: 10-20 years

Used in: Cabinetry, wall paneling, decorative pieces.

Notes: Less durable than plywood; susceptible to moisture damage, but offers a smooth surface for painting and finishes.

Marble & Granite

Lifespan: 30-100 years

Used in: Flooring, countertops, wall cladding.

Notes: Natural stones are long-lasting and highly durable but require periodic maintenance like sealing.

Quartz

Lifespan: 25-30 years

Used in: Countertops, tabletops.

Notes: Engineered stone that's stain-resistant and low-maintenance compared to natural stone.

Ceramic & Porcelain Tiles

Lifespan: 20-50 years

Used in: Flooring, wall tiles, backsplashes.

Notes: Durable and available in numerous designs, colors, and sizes. Porcelain is denser and more durable than ceramic.

Vinyl Flooring

Lifespan: 10-20 years

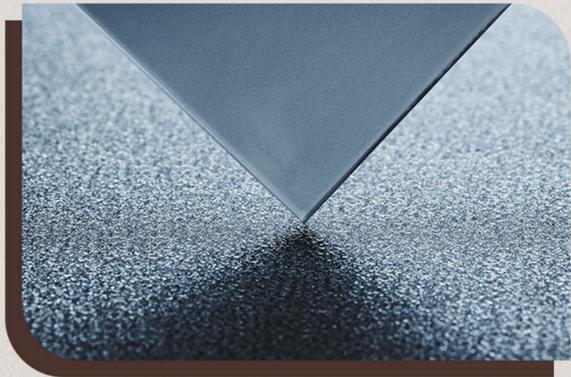

Used in: Flooring for residential and commercial spaces.

Notes: Easy to install, water-resistant, and available in many styles, but may wear down faster in high-traffic areas.

MATERIAL

WE USE

Acrylic

Lifespan: 10-15 years

Used in: Modular kitchen shutters, wall units, wardrobes.

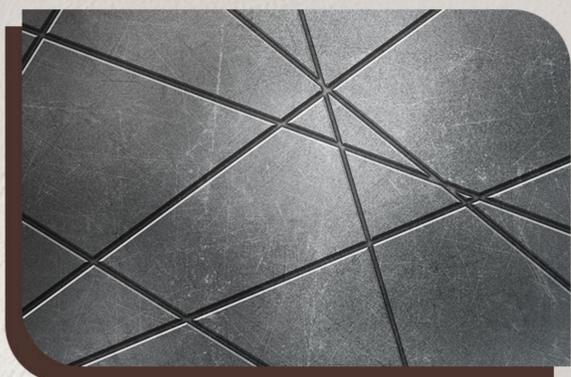

Notes: High-gloss finish and scratch-resistant but can lose its sheen over time if not maintained properly.

Glass

Lifespan: 25-30 years

Used in: Windows, partitions, tabletops, cabinets.

Notes: Modern and stylish but prone to scratches and breakage; requires regular cleaning to maintain clarity.

Stainless Steel & Aluminum

Lifespan: 20-50 years

Used in: Kitchen hardware, fittings, railings, furniture.

Notes: Resistant to corrosion and wear; stainless steel is more durable, while aluminum is lightweight.

Wallpaper

Lifespan: 5-15 years

Used in: Wall coverings for feature walls or entire rooms.

Notes: Lifespan depends on type and installation quality.

Vinyl wallpapers last longer and are washable.

Paint (Emulsion & Enamel)

Lifespan: 5-10 years

Used in: Interior walls, ceilings, trims.

Notes: High-quality emulsion paint can last up to 10 years, while enamel paints are more durable for trims and doors.

Upholstery Fabric

Lifespan: 5-15 years

Used in: Sofas, chairs, cushions, and other soft furnishings.

Notes: Natural fibers (like cotton or linen) wear faster, while synthetic blends (like polyester) are more durable and stain-resistant.

PVC Panels

Lifespan: 20-25 years

Used in: Wall and ceiling coverings.

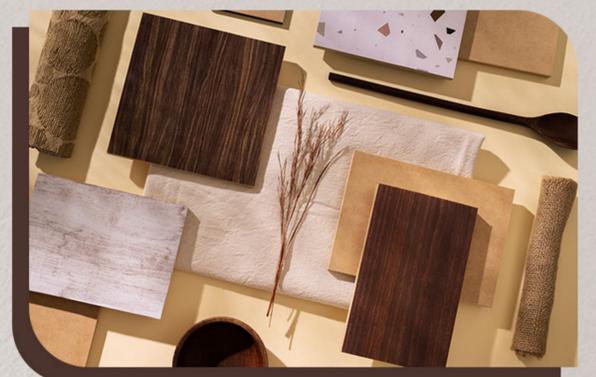

Notes: Lightweight, water-resistant, and termite-proof. Ideal for moisture-prone areas like bathrooms and kitchens.

Gypsum Board (Drywall)

Lifespan: 20-30 years

Used in: False ceilings, wall partitions.

Notes: Fire-resistant and easy to install but can be damaged by moisture if not sealed properly.

MRS. MONISHA

RUSTIC DESIGN

From creating the perfect layout to finding pieces I absolutely loved, my designer really took my space to the next level. I never dreamed my home could look – and feel – this good!

MR. IVAN

TRADITIONAL DESIGN

The quality of work, finishes & Materials has been Excellent. I never thought my home could look this Incredible.

MR. SATYAJIT

MODERN DESIGN

Indecor Team gave us very good suggestions while executing the designs for our new home. we are very happy with the result.

MR. GAURAV
MINIMALIST DESIGN

Terrific work from beginning to end can work any angle from minimal help to complete project handling professional without a doubt! love!

MR. MICHELLE
LUXURY DESIGN

Indecor was very helpful when it came to designing a minimal but spacious home for us. We are happy with the results.
